

Assignment 1 Grading Scheme

Robin Dawes

September 23, 2021

Correctness : 70%

The plaintext and key test values will be provided to the graders and will be the same for each student. The input values have been selected to test that the submitted solution meets the requirements of the assignment.

1. Correct output on the input "Plaintext1" and "Key1" : 20 points
2. Correct output on the input "Plaintext2" and "Key2" : 20 points
3. Correct output on the input "Plaintext3" and "Key3" : 20 points
4. Correct output on the input "Plaintext4" and "Key4" : 10 points

Programming Style : 30%

1. Appropriate names used for variables and function (if any) : 10 points
2. Appropriate use of comments (docstrings not required) : 10 points
3. Appropriate organization of code (eg. function definitions - if any - either grouped together near the top of the program, or placed close to where the function is used.) : 10 points
